

Akash (2+ Yrs Exp)

(Full Stack Developer)

Mobile: +91 97181 25109

Email: codeguyakash@gmail.com

Skills

- **Frontend:** JavaScript, React.js, Angular, CSS, Tailwind CSS
- **Backend:** Node.js, Express.js, Socket.io
- **Database:** MongoDB, MySQL
- **Tools & Others:** Git, GitHub, Linux, Postman
- **Familiar:** React Native, Flutter, Mobile App Development

Work Experience

[Webartsol Solution](#) (Full Stack Engineer)

July 2023 to April 2025

- [Vicare Victoriavn \(E-commerce Health App\)](#) - (React.js)
An online healthcare platform where patients can book appointments with doctors for both **individual** and **corporate** needs.
 - Developed dynamic UI with **conditional component rendering** in React.js.
 - Integrated multiple **REST APIs** for appointment booking, user management, and corporate workflows.
 - Created **reusable and modular components** to maintain scalability and reduce code duplication.
 - Resolved UI and logic bugs to improve **overall performance and user experience**.
 - [16+ Pull Requests Merged \(Link\)](#)
- [Prowtech \(Campaign Management Platform\)](#) - (Angular)
A complete CMS-based solution to manage and run **digital advertisement campaigns** on mall display screens.
 - Set up the **Angular-based admin dashboard** from scratch.
 - Built **reusable UI components** and handled **API integrations** for campaign workflows.
 - Enabled functionalities for **video upload, approval, and scheduling**.
 - Integrated **real-time control system** using **WebSockets** to manage display content remotely
 - [130+ Pull Requests Merged](#)

- [Prowtech Android App](#) - (React Native)
Developed a **custom Android application** using **React Native**, installed on mall screen devices.
 - **Real-time screenshot** capture of what's currently playing on the screen.
 - **Remote restart** functionality to recover from crashes or performance issues.
 - Dynamic overlay updates pushed live without **restarting** the app.
 - **Real-time** on-screen bug reporting for **monitoring** and **debugging**.
 - **Remote cache clearing** to optimize device performance.
 - [43+ Pull Requests Merged](#)
- [Solar By Luminous \(Vendor Feedback Dashboard\)](#) - (Angular)
Developed an internal feedback system for **Luminous** to manage and track behavioral feedback between vendors and employees.
 - Set up the project from scratch using Angular and created a responsive **admin dashboard**.
 - Built **reusable UI components** for consistency and scalability across the application.
 - Implemented **API integrations** for collecting and displaying feedback data in real-time.
 - Enabled two-way feedback flow: **employee-to-vendor** and **vendor-to-employee**, with detailed reporting and filters.
 - [30+ Pull Requests Merged](#)

[BrainyDx Technologies](#) (Frontend Engineer Intern)

Apr 2022 to July 2022

- Creating reusable react components.
- Implement and deliver tasks.
- Collaborate with UX designers to create user-friendly interfaces.
- Stay up-to-date with the latest front-end technologies and implement them.

[Broadmail](#) - Full Stack Email Service • (Next.js/TailwindCSS/Node.js/Express.js/NextAuth/)

- Integrate NextAuth.js for user Authentication with Google.
- Scalable Backend for Handling multiple requests.

[Image Detect Tool](#) - • (Template Engine (ejs)/Node.js/Express.js/GoogleVisionApi)

- Integrate Google Vision API to detect Objects and Labels from Images.
- I developed a tool using Google Vision API to detect individuals in truck cabins or at Dharam Kanta panels.
- Enhanced security and accuracy in weighing trucks and heavy vehicles

[Google Docs Adv](#) - • (Template Engine (ejs)/Node.js/Express.js/Google Docs)

- I implemented a user-friendly interface with features like text formatting, document saving, and sharing.

Education

Indira Gandhi National Open University -

- Master Degree in Computer Applications.
- Bachelor's Degree in Computer Applications.

Jul 2025 - Present

Jul 2020 - Dec 2024
